Certain versions of [Call Recording](#) from [Eleveo](#) contain the following vulnerability:

A privilege escalation vulnerability in ZOOM Call Recording 6.3.1 allows its user account (i.e., the account under which the program runs - by default, the callrec account) to elevate privileges to root by abusing the callrec-rs@.service. The callrec-rs@.service starts the /opt/callrec/bin/rs binary with root privileges, and this binary is owned by callrec. It can be replaced by a Trojan horse.

CVE-2019-18822 has been assigned by [M](#) cve@mitre.org to track the vulnerability - currently rated as **HIGH** severity.
