

# CVE-2019-4402

[MITRE](#)[NVD](#)[CVE.ORG](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2019-4402                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | psirt@us.ibm.com                                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2019-08-20 19:15:00 UTC                                                                                                  |
| <b>Updated</b>         | 2022-01-01 20:18:00 UTC                                                                                                  |
| <b>Description</b>     | IBM API Connect 2018.1 through 2018.4.1.6 developer portal could allow an unauthorized user to cause a denial of service |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product     | Version | Update | Edition | Language |
|-------------|--------|-------------|---------|--------|---------|----------|
| Application | ibm    | Api Connect | All     | All    | All     | All      |
