

# CVE-2020-0525

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                              |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-0525                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                       |
| <b>Assigner</b>        | secure@intel.com                                                                                                             |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                 |
| <b>Published</b>       | 2021-02-17 14:15:00 UTC                                                                                                      |
| <b>Updated</b>         | 2021-07-21 11:39:00 UTC                                                                                                      |
| <b>Description</b>     | Improper access control in firmware for the Intel(R) Ethernet I210 Controller series of network adapters before version 3.30 |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                | Product                                           | Version | Update | Edition | Language |
