| <b>Published</b>       | 2020-04-28 21:15:00 UTC                                                                                                                                                                                                         |
| <b>Updated</b>         | 2020-05-18 12:15:00 UTC                                                                                                                                                                                                         |
| <b>Description</b>     | In Tiny File Manager 2.4.1, there is a Path Traversal vulnerability in the ajax recursive directory listing functionality. This allows an attacker to traverse the file system and access files outside the intended directory. |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                                    | Product                           | Version | Update | Edition | Language |
|-------------|-------------------------------------------|-----------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Tiny File Manager Project</a> | <a href="#">Tiny File Manager</a> | 2.4.1   | All    | All     | All      |
| Application | <a href="#">Tiny File Manager Project</a> | <a href="#">Tiny File Manager</a> | 2.4.1   | All    | All     | All      |
