

# CVE-2020-12766

[MITRE](#)[NVD](#)[CVE.ORG](#)[Print: PDF](#) 

## Summary

|                        |                                                                                                       |
|------------------------|-------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-12766                                                                                        |
| <b>State</b>           | PUBLIC                                                                                                |
| <b>Assigner</b>        | cve@mitre.org                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                          |
| <b>Published</b>       | 2020-05-09 19:15:00 UTC                                                                               |
| <b>Updated</b>         | 2020-05-12 19:16:00 UTC                                                                               |
| <b>Description</b>     | Gnuteca 3.8 allows action=main:search:simpleSearch SQL Injection via the exemplaryStatusId parameter. |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                | Product                 | Version | Update | Edition | Language |
|-------------|-----------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Solis</a> | <a href="#">Gnuteca</a> | 3.8     | All    | All     | All      |
| Application | <a href="#">Solis</a> | <a href="#">Gnuteca</a> | 3.8     | All    | All     | All      |
