

# CVE-2020-14336

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-14336                                                                                                              |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | secalert@redhat.com                                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2021-06-02 12:15:00 UTC                                                                                                     |
| <b>Updated</b>         | 2023-02-12 23:40:00 UTC                                                                                                     |
| <b>Description</b>     | A flaw was found in the Restricted Security Context Constraints (SCC), where it allows pods to craft custom network packets |

## Risk And Classification

### Problem Types: CWE-770

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                                      | Version | Update | Edition | Language |
|-------------|------------------------|----------------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Redhat</a> | <a href="#">Openshift Container Platform</a> | 3.11    | All    | All     | All      |
| Application | <a href="#">Redhat</a> | <a href="#">Openshift Container Platform</a> | 4.5.16  | All    | All     | All      |
| Application | <a href="#">Redhat</a> | <a href="#">Openshift Container Platform</a> | 4.6     | All    | All     | All      |
