

# CVE-2020-15002

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                          |
|------------------------|------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-15002                                                                           |
| <b>State</b>           | PUBLIC                                                                                   |
| <b>Assigner</b>        | cve@mitre.org                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                             |
| <b>Published</b>       | 2020-10-23 05:15:00 UTC                                                                  |
| <b>Updated</b>         | 2020-10-26 18:13:00 UTC                                                                  |
| <b>Description</b>     | OX App Suite through 7.10.3 allows SSRF via the the /ajax/messaging/message message API. |

## Risk And Classification

**Problem Types:** CWE-918

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                       | Product                               | Version | Update | Edition | Language |
|-------------|------------------------------|---------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Open-xchange</a> | <a href="#">Open-xchange Appsuite</a> | All     | All    | All     | All      |
