

# CVE-2020-23879

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                               |
|------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-23879                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                        |
| <b>Assigner</b>        | cve@mitre.org                                                                                                 |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                  |
| <b>Published</b>       | 2021-11-10 22:15:00 UTC                                                                                       |
| <b>Updated</b>         | 2021-11-12 22:05:00 UTC                                                                                       |
| <b>Description</b>     | pdf2json v0.71 was discovered to contain a NULL pointer dereference in the component ObjectStream::getObject. |

## Risk And Classification

**Problem Types:** CWE-476

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                    | Product                  | Version | Update | Edition | Language |
|-------------|---------------------------|--------------------------|---------|--------|---------|----------|
| Application | <a href="#">Flowpaper</a> | <a href="#">Pdf2json</a> | 0.71    | All    | All     | All      |
