

# CVE-2020-25104

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-25104                                                                                                              |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | cve@mitre.org                                                                                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2020-09-03 15:15:00 UTC                                                                                                     |
| <b>Updated</b>         | 2020-09-10 19:04:00 UTC                                                                                                     |
| <b>Description</b>     | eramba c2.8.1 and Enterprise before e2.19.3 allows XSS via a crafted filename for a file attached to an object. For example |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                | Version | Update | Edition | Language |
|-------------|------------------------|------------------------|---------|--------|---------|----------|
| Application | <a href="#">Eramba</a> | <a href="#">Eramba</a> | 2.19.3  | All    | All     | All      |
| Application | <a href="#">Eramba</a> | <a href="#">Eramba</a> | 2.8.1   | All    | All     | All      |
| Application | <a href="#">Eramba</a> | <a href="#">Eramba</a> | 2.19.3  | All    | All     | All      |
| Application | <a href="#">Eramba</a> | <a href="#">Eramba</a> | 2.8.1   | All    | All     | All      |
