

# CVE-2020-3259

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                              |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-3259                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                       |
| <b>Assigner</b>        | psirt@cisco.com                                                                                                              |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                 |
| <b>Published</b>       | 2020-05-06 17:15:00 UTC                                                                                                      |
| <b>Updated</b>         | 2023-08-16 16:17:00 UTC                                                                                                      |
| <b>Description</b>     | A vulnerability in the web services interface of Cisco Adaptive Security Appliance (ASA) Software and Cisco Firepower Threat |

## Risk And Classification

**EPSS:** 0.697250000 probability, percentile 0.986790000 (date 2026-05-05)

**CISA KEV:** Listed on 2024-02-15; due 2024-03-07; ransomware use Known

**Problem Types:** NVD-CWE-noinfo
