

# CVE-2020-7208

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                        |
|------------------------|----------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2020-7208                                                                          |
| <b>State</b>           | PUBLIC                                                                                 |
| <b>Assigner</b>        | security-alert@hpe.com                                                                 |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                           |
| <b>Published</b>       | 2020-02-13 00:15:00 UTC                                                                |
| <b>Updated</b>         | 2020-02-18 18:21:00 UTC                                                                |
| <b>Description</b>     | LinuxKI v6.0-1 and earlier is vulnerable to an XSS which is resolved in release 6.0-2. |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor             | Product                 | Version | Update | Edition | Language |
|-------------|--------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Hp</a> | <a href="#">Linuxki</a> | All     | All    | All     | All      |
| Application | <a href="#">Hp</a> | <a href="#">Linuxki</a> | All     | All    | All     | All      |
