

# CVE-2021-20496

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-20496                                                                                                              |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | psirt@us.ibm.com                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2021-07-15 18:15:00 UTC                                                                                                     |
| <b>Updated</b>         | 2021-09-29 15:37:00 UTC                                                                                                     |
| <b>Description</b>     | IBM Security Verify Access Docker 10.0.0 could allow an authenticated user to bypass input due to improper input validation |

## Risk And Classification

### Problem Types: CWE-20

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                                 | Version | Update | Edition | Language |
|-------------|------------------------|-----------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Docker</a> | <a href="#">Docker</a>                  | -       | All    | All     | All      |
| Application | <a href="#">Docker</a> | <a href="#">Docker</a>                  | -       | All    | All     | All      |
| Application | <a href="#">Ibm</a>    | <a href="#">Security Access Manager</a> | 9.0.7   | All    | All     | All      |
| Application | <a href="#">Ibm</a>    | <a href="#">Security Verify Access</a>  | 10.0.0  | All    | All     | All      |
