

# CVE-2021-23432

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                     |
|------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-23432                                                                                                      |
| <b>State</b>           | PUBLIC                                                                                                              |
| <b>Assigner</b>        | report@snyk.io                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                        |
| <b>Published</b>       | 2021-08-24 09:15:00 UTC                                                                                             |
| <b>Updated</b>         | 2021-08-31 01:50:00 UTC                                                                                             |
| <b>Description</b>     | This affects all versions of package mootools. This is due to the ability to pass untrusted input to Object.merge() |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                           | Product                  | Version | Update | Edition | Language |
|-------------|----------------------------------|--------------------------|---------|--------|---------|----------|
| Application | <a href="#">Mootools Project</a> | <a href="#">Mootools</a> | All     | All    | All     | All      |
