

# CVE-2021-25918

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-25918                                                                                                                 |
| <b>State</b>           | PUBLIC                                                                                                                         |
| <b>Assigner</b>        | vulnerabilitylab@whitesourcesoftware.com                                                                                       |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                   |
| <b>Published</b>       | 2021-03-22 20:15:00 UTC                                                                                                        |
| <b>Updated</b>         | 2021-03-29 19:28:00 UTC                                                                                                        |
| <b>Description</b>     | In OpenEMR, versions 5.0.2 to 6.0.0 are vulnerable to Stored Cross-Site-Scripting (XSS) due to user input not being validated. |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                 | Version | Update | Edition | Language |
|-------------|--------------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Open-emr</a> | <a href="#">Openemr</a> | All     | All    | All     | All      |
