

# CVE-2021-30128

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                   |
|------------------------|-------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-30128                                                    |
| <b>State</b>           | PUBLIC                                                            |
| <b>Assigner</b>        | security@apache.org                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                      |
| <b>Published</b>       | 2021-04-27 20:15:00 UTC                                           |
| <b>Updated</b>         | 2023-11-07 03:32:00 UTC                                           |
| <b>Description</b>     | Apache OFBiz has unsafe deserialization prior to 17.12.07 version |

## Risk And Classification

**Problem Types:** CWE-502

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product               | Version | Update | Edition | Language |
|-------------|------------------------|-----------------------|---------|--------|---------|----------|
| Application | <a href="#">Apache</a> | <a href="#">Ofbiz</a> | All     | All    | All     | All      |
