Certain versions of [Ecs Imaging](#) from [Medicalexpo](#) contain the following vulnerability:

**\*\* UNSUPPORTED WHEN ASSIGNED \*\*** EVOLUCARE

ECSIMAGING (aka ECS Imaging) through 6.21.5 has multiple SQL Injection issues in the login form and the password-forgotten form (such as `/req_password_user.php?email=`). This allows an attacker to steal data in the database and obtain access to the application. (The database component runs as root.) NOTE: This vulnerability only affects products that are no longer supported by the maintainer.

CVE-2021-3118 has been assigned by [M](#) [cve@mitre.org](mailto:cve@mitre.org) to track the vulnerability - currently rated as **CRITICAL** severity.
