

# CVE-2021-31913

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                           |
|------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-31913                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                    |
| <b>Assigner</b>        | cve@mitre.org                                                                                                             |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                              |
| <b>Published</b>       | 2021-05-11 13:15:00 UTC                                                                                                   |
| <b>Updated</b>         | 2021-05-17 15:08:00 UTC                                                                                                   |
| <b>Description</b>     | In JetBrains TeamCity before 2020.2.3, insufficient checks of the redirect_uri were made during GitHub SSO token exchange |

## Risk And Classification

### Problem Types: CWE-354

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                    | Product                  | Version | Update | Edition | Language |
|-------------|---------------------------|--------------------------|---------|--------|---------|----------|
| Application | <a href="#">Jetbrains</a> | <a href="#">Teamcity</a> | All     | All    | All     | All      |
