| <b>CVE</b>             | CVE-2021-33491                                                                                                                                                 |
| <b>State</b>           | PUBLIC                                                                                                                                                         |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                                  |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                   |
| <b>Published</b>       | 2021-11-22 09:15:00 UTC                                                                                                                                        |
| <b>Updated</b>         | 2021-11-23 20:22:00 UTC                                                                                                                                        |
| <b>Description</b>     | OX App Suite through 7.10.5 allows Directory Traversal via ../ in an OOXML or ODF ZIP archive, because of the mishandling of the directory traversal sequence. |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor       | Product      | Version | Update | Edition | Language |
|-------------|--------------|--------------|---------|--------|---------|----------|
| Application | Open-xchange | Ox App Suite | All     | All    | All     | All      |
