Print: PDF

Certain versions of [After Effects](#) from [Adobe](#) contain the following vulnerability:

Adobe After Effects version 18.2.1 (and earlier) is affected by an Improper input validation vulnerability when parsing a specially crafted file. An unauthenticated attacker could leverage this vulnerability to disclose arbitrary memory information in the context of the current user. Exploitation of this issue requires user interaction in that a victim must open a malicious file.

CVE-2021-35995 has been assigned by [psirt@adobe.com](#) to track the vulnerability - currently rated as **LOW** severity.

Affected Vendor/Software: [Adobe](#) - **After Effects** version <= 18.2.1

Affected Vendor/Software: [Adobe](#) - **After Effects** version <= None

Affected Vendor/Software: [Adobe](#) - **After Effects** version <= None

Affected Vendor/Software: [Adobe](#) - **After Effects** version <= None

CVSS3 Score: **3.3 - LOW**

Attack Vector	Attack Complexity	Privileges Required	User Interaction
LOCAL	LOW	NONE	REQUIRED
Scope	Confidentiality Impact	Integrity Impact	Availability Impact
UNCHANGED	LOW	NONE	NONE

CVSS2 Score: **4.3 - MEDIUM**

Access Vector	Access Complexity	Authentication
NETWORK	MEDIUM	NONE
Confidentiality Impact	Integrity Impact	Availability Impact
