

# CVE-2021-36762

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                      |
|------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-36762                                                                                                       |
| <b>State</b>           | PUBLIC                                                                                                               |
| <b>Assigner</b>        | cve@mitre.org                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                         |
| <b>Published</b>       | 2021-08-19 12:15:00 UTC                                                                                              |
| <b>Updated</b>         | 2023-08-08 14:21:00 UTC                                                                                              |
| <b>Description</b>     | An issue was discovered in HCC Embedded InterNiche NicheStack through 4.3. The tfshnd():ftpsrv.c TFTP packet process |

## Risk And Classification

**Problem Types:** NVD-CWE-Other

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                       | Product                    | Version | Update | Edition | Language |
|-------------|------------------------------|----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Hcc-embedded</a> | <a href="#">Nichestack</a> | All     | All    | All     | All      |
