

# CVE-2021-39810

[MITRE](#)[NVD](#)[CVE.ORG](#)[Print: PDF](#) 

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-39810                                                                                                              |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | security@android.com                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2023-10-30 17:15:00 UTC                                                                                                     |
| <b>Updated</b>         | 2023-11-03 16:46:00 UTC                                                                                                     |
| <b>Description</b>     | In NFC, there is a possible way to setup a default contactless payment app without user consent due to a missing permission |

## Risk And Classification

### Problem Types: CWE-862

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                 | Product                 | Version | Update | Edition | Language |
|------------------|------------------------|-------------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | All     | All    | All     | All      |
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | 14.0    | All    | All     | All      |
