

# CVE-2021-42970

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                    |
|------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-42970                                                                                                     |
| <b>State</b>           | PUBLIC                                                                                                             |
| <b>Assigner</b>        | cve@mitre.org                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                       |
| <b>Published</b>       | 2022-03-29 18:15:00 UTC                                                                                            |
| <b>Updated</b>         | 2022-04-04 19:00:00 UTC                                                                                            |
| <b>Description</b>     | Cross Site Scripting (XSS) vulnerability exists in cxuucms v3 via the imgurl of /feedback/post/ content parameter. |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor               | Product                 | Version | Update | Edition | Language |
|-------------|----------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Cxxu</a> | <a href="#">Cxxucms</a> | 3.0     | All    | All     | All      |
