

# CVE-2021-43575

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                   |
|------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-43575                                                                                                    |
| <b>State</b>           | PUBLIC                                                                                                            |
| <b>Assigner</b>        | cve@mitre.org                                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                      |
| <b>Published</b>       | 2021-11-09 23:15:00 UTC                                                                                           |
| <b>Updated</b>         | 2023-11-07 03:39:00 UTC                                                                                           |
| <b>Description</b>     | ** DISPUTED ** KNX ETS6 through 6.0.0 uses the hard-coded password ETS5Password, with a salt value of Ivan Medved |

## Risk And Classification

### Problem Types: CWE-798

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product                     | Version | Update | Edition | Language |
|-------------|--------|-----------------------------|---------|--------|---------|----------|
| Application | Knx    | Engineering Tool Software 6 | 6.0.0   | All    | All     | All      |
