

# CVE-2021-43851

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                  |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-43851                                                                                                                                   |
| <b>State</b>           | PUBLIC                                                                                                                                           |
| <b>Assigner</b>        | security-advisories@github.com                                                                                                                   |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                     |
| <b>Published</b>       | 2021-12-22 00:15:00 UTC                                                                                                                          |
| <b>Updated</b>         | 2021-12-28 14:58:00 UTC                                                                                                                          |
| <b>Description</b>     | Anuko Time Tracker is an open source, web-based time tracking application written in PHP. SQL injection vulnerability exists in the application. |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product      | Version | Update | Edition | Language |
|-------------|--------|--------------|---------|--------|---------|----------|
| Application | Anuko  | Time Tracker | All     | All    | All     | All      |
