

# CVE-2021-43973

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-43973                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                 |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2022-01-11 20:15:00 UTC                                                                                                       |
| <b>Updated</b>         | 2022-01-20 17:29:00 UTC                                                                                                       |
| <b>Description</b>     | An unrestricted file upload vulnerability in /UploadPslcon.jsp in SysAid ITIL 20.4.74 b10 allows a remote authenticated attac |

## Risk And Classification

### Problem Types: CWE-434

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                | Version | Update | Edition | Language |
|-------------|------------------------|------------------------|---------|--------|---------|----------|
| Application | <a href="#">Sysaid</a> | <a href="#">Sysaid</a> | 20.4.74 | b10    | All     | All      |
