

# CVE-2021-44992

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-44992                                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                                     |
| <b>Assigner</b>        | cve@mitre.org                                                                                                              |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                               |
| <b>Published</b>       | 2022-01-25 01:15:00 UTC                                                                                                    |
| <b>Updated</b>         | 2022-01-27 17:43:00 UTC                                                                                                    |
| <b>Description</b>     | There is an Assertion "ecma_object_is_typedarray (obj_p)" failed at /jerry-core/ecma/operations/ecma-typedarray-object.c i |

## Risk And Classification

### Problem Types: CWE-119

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                      | Product                     | Version | Update | Edition | Language |
|-------------|-----------------------------|-----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Jerryscript</a> | <a href="#">Jerryscript</a> | 3.0.0   | All    | All     | All      |
