

# CVE-2021-46892

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2021-46892                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | psirt@huawei.com                                                                                                              |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2023-07-06 13:15:00 UTC                                                                                                       |
| <b>Updated</b>         | 2023-07-12 19:00:00 UTC                                                                                                       |
| <b>Description</b>     | Encryption bypass vulnerability in Maintenance mode. Successful exploitation of this vulnerability may affect service confide |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                 | Product                   | Version | Update | Edition | Language |
|------------------|------------------------|---------------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Huawei</a> | <a href="#">Emui</a>      | 12.0.0  | All    | All     | All      |
| Operating System | <a href="#">Huawei</a> | <a href="#">Harmonyos</a> | 2.0.0   | All    | All     | All      |
