

# CVE-2022-0596

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-0596                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                 |
| <b>Assigner</b>        | security@huntr.dev                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                           |
| <b>Published</b>       | 2022-02-15 14:15:00 UTC                                                                                |
| <b>Updated</b>         | 2023-06-29 09:15:00 UTC                                                                                |
| <b>Description</b>     | Improper Validation of Specified Quantity in Input in Packagist microweber/microweber prior to 1.2.11. |

## Risk And Classification

**Problem Types:** CWE-1284

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                     | Product                    | Version | Update | Edition | Language |
|-------------|----------------------------|----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Microweber</a> | <a href="#">Microweber</a> | All     | All    | All     | All      |
