

# CVE-2022-0851

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-0851                                                                                                                  |
| <b>State</b>           | PUBLIC                                                                                                                         |
| <b>Assigner</b>        | secalert@redhat.com                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                   |
| <b>Published</b>       | 2022-08-29 15:15:00 UTC                                                                                                        |
| <b>Updated</b>         | 2023-02-12 22:15:00 UTC                                                                                                        |
| <b>Description</b>     | There is a flaw in convert2rhel. When the --activationkey option is used with convert2rhel, the activation key is subsequently |

## Risk And Classification

### Problem Types: CWE-200

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                               | Product                          | Version | Update | Edition | Language |
|------------------|--------------------------------------|----------------------------------|---------|--------|---------|----------|
| Application      | <a href="#">Convert2rhel Project</a> | <a href="#">Convert2rhel</a>     | -       | All    | All     | All      |
| Operating System | <a href="#">Redhat</a>               | <a href="#">Enterprise Linux</a> | 7.0     | All    | All     | All      |
| Operating System | <a href="#">Redhat</a>               | <a href="#">Enterprise Linux</a> | 8.0     | All    | All     | All      |
