CVE-2022-0130

[Source: Mitre](#)

[Source: Nist](#)

[Print: PDF](#)

The following vulnerability was found:

Tenable.sc versions 5.14.0 through 5.19.1 were found to contain a remote code execution vulnerability which could allow a remote, unauthenticated attacker to execute code under special circumstances. An attacker would first have to stage a specific file type in the web server root of the Tenable.sc host prior to remote exploitation.

CVE-2022-0130 has been assigned by vulnreport@tenable.com to track the vulnerability
