

# CVE-2022-1531

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-1531                                                                                                               |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | security@huntr.dev                                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2022-04-29 09:15:00 UTC                                                                                                     |
| <b>Updated</b>         | 2023-03-07 22:36:00 UTC                                                                                                     |
| <b>Description</b>     | SQL injection vulnerability in ARAX-UI Synonym Lookup functionality in GitHub repository rtxteam/rtx prior to checkpoint_20 |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                      | Product             | Version | Update | Edition | Language |
|-------------|-----------------------------|---------------------|---------|--------|---------|----------|
| Application | <a href="#">Rtx Project</a> | <a href="#">Rtx</a> | All     | All    | All     | All      |
