

# CVE-2022-2032

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-2032                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | cve-coordination@incibe.es                                                                                              |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2022-07-25 18:22:00 UTC                                                                                                 |
| <b>Updated</b>         | 2022-08-02 15:22:00 UTC                                                                                                 |
| <b>Description</b>     | In Pandora FMS v7.0NG.761 and below, in the file manager section, the dirname parameter is vulnerable to a Stored Cross |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                     | Product                     | Version | Update | Edition | Language |
|-------------|----------------------------|-----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Pandorafms</a> | <a href="#">Pandora Fms</a> | All     | All    | All     | All      |
