

# CVE-2022-22909

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-22909                                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                                     |
| <b>Assigner</b>        | cve@mitre.org                                                                                                              |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                               |
| <b>Published</b>       | 2022-03-03 00:15:00 UTC                                                                                                    |
| <b>Updated</b>         | 2022-03-09 19:28:00 UTC                                                                                                    |
| <b>Description</b>     | HotelDruid v3.0.3 was discovered to contain a remote code execution (RCE) vulnerability which is exploited via an attacker |

## Risk And Classification

### Problem Types: CWE-94

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor       | Product    | Version | Update | Edition | Language |
|-------------|--------------|------------|---------|--------|---------|----------|
| Application | Digitaldruid | Hoteldruid | 3.0.3   | All    | All     | All      |

## References
