

# CVE-2022-24979

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-24979                                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | cve@mitre.org                                                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2022-02-19 04:15:00 UTC                                                                                                 |
| <b>Updated</b>         | 2022-03-07 16:52:00 UTC                                                                                                 |
| <b>Description</b>     | An issue was discovered in the Varnishcache extension before 2.0.1 for TYPO3. The Edge Site Includes (ESI) content elen |

## Risk And Classification

### Problem Types: CWE-639

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor   | Product      | Version | Update | Edition | Language |
|-------------|----------|--------------|---------|--------|---------|----------|
| Application | Mittwald | Varnishcache | All     | All    | All     | All      |

## References
