

# CVE-2022-25234

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                                                     |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-25234                                                                                                                                                                      |
| <b>State</b>           | PUBLIC                                                                                                                                                                              |
| <b>Assigner</b>        | vultures@jpcert.or.jp                                                                                                                                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                                        |
| <b>Published</b>       | 2022-03-10 17:47:00 UTC                                                                                                                                                             |
| <b>Updated</b>         | 2022-03-14 23:41:00 UTC                                                                                                                                                             |
| <b>Description</b>     | Out-of-bounds write vulnerability in CX-Programmer v9.76.1 and earlier which is a part of CX-One (v4.60) suite allows an attacker to execute arbitrary code with system privileges. |

## Risk And Classification

### Problem Types: CWE-787

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product       | Version | Update | Edition | Language |
|-------------|--------|---------------|---------|--------|---------|----------|
| Application | Omron  | Cx-programmer | All     | All    | All     | All      |

## References
