

# CVE-2022-25452

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                       |
|------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-25452                                                                                                        |
| <b>State</b>           | PUBLIC                                                                                                                |
| <b>Assigner</b>        | cve@mitre.org                                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                          |
| <b>Published</b>       | 2022-03-18 21:15:00 UTC                                                                                               |
| <b>Updated</b>         | 2022-03-25 03:55:00 UTC                                                                                               |
| <b>Description</b>     | Tenda AC6 v15.03.05.09_multi was discovered to contain a stack overflow via the URLs parameter in the saveParentContr |

## Risk And Classification

### Problem Types: CWE-787

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                | Product                      | Version     | Update | Edition | Language |
|------------------|-----------------------|------------------------------|-------------|--------|---------|----------|
| Hardware         | <a href="#">Tenda</a> | <a href="#">Ac6</a>          | -           | All    | All     | All      |
| Operating System | <a href="#">Tenda</a> | <a href="#">Ac6 Firmware</a> | 15.03.05.09 | All    | All     | All      |
