

# CVE-2022-25894

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-25894                                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | report@snyk.io                                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2023-01-26 21:15:00 UTC                                                                                                 |
| <b>Updated</b>         | 2023-11-07 03:44:00 UTC                                                                                                 |
| <b>Description</b>     | All versions of the package com.bstek.uflo:uflo-core are vulnerable to Remote Code Execution (RCE) in the ExpressionCor |

## Risk And Classification

### Problem Types: CWE-94

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                       | Product              | Version | Update | Edition | Language |
|-------------|------------------------------|----------------------|---------|--------|---------|----------|
| Application | <a href="#">Uflo Project</a> | <a href="#">Uflo</a> | All     | All    | All     | All      |
