

# CVE-2022-26013

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-26013                                                                                                                 |
| <b>State</b>           | PUBLIC                                                                                                                         |
| <b>Assigner</b>        | ics-cert@hq.dhs.gov                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                   |
| <b>Published</b>       | 2022-03-29 17:15:00 UTC                                                                                                        |
| <b>Updated</b>         | 2022-04-01 18:28:00 UTC                                                                                                        |
| <b>Description</b>     | Delta Electronics DIAEnergie (All versions prior to 1.8.02.004) has a blind SQL injection vulnerability that exists in DIAE_dr |

## Risk And Classification

**Problem Types:** CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product    | Version | Update | Edition | Language |
|-------------|---------|------------|---------|--------|---------|----------|
| Application | Deltaww | Diaenergie | All     | All    | All     | All      |

## References
