

# CVE-2022-28915

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                     |
|------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-28915                                                                                                      |
| <b>State</b>           | PUBLIC                                                                                                              |
| <b>Assigner</b>        | cve@mitre.org                                                                                                       |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                        |
| <b>Published</b>       | 2022-05-10 14:15:00 UTC                                                                                             |
| <b>Updated</b>         | 2023-08-08 14:21:00 UTC                                                                                             |
| <b>Description</b>     | D-Link DIR-816 A2_v1.10CNB04 was discovered to contain a command injection vulnerability via the admuser and admpas |

## Risk And Classification

### Problem Types: CWE-78

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                | Product                          | Version   | Update | Edition | Language |
|------------------|-----------------------|----------------------------------|-----------|--------|---------|----------|
| Hardware         | <a href="#">Dlink</a> | <a href="#">Dir-816</a>          | a2        | All    | All     | All      |
| Operating System | <a href="#">Dlink</a> | <a href="#">Dir-816 Firmware</a> | 1.10cnb04 | All    | All     | All      |
