CVE-2022-29597

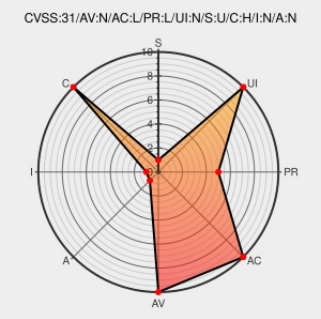
Source: Mitre | Source: NIST | CVE.ORG | Print: PDF



Certain versions of Regulatory Reporting System from Solutions-atlantic contain the following vulnerability:

Solutions Atlantic Regulatory Reporting System (RRS) v500 is vulnerable to Local File Inclusion (LFI). Any authenticated user has the ability to reference internal system files within requests made to the RRSWeb/maint/ShowDocument/ShowDocument.aspx page. The server will successfully respond with the file contents of the internal system file requested. This ability could allow for adversaries to extract sensitive data and/or files from the underlying file system, gain knowledge about the internal workings of the system, or access source code of the application.

CVE-2022-29597 has been assigned by cve@mitre.org to track the vulnerability - currently rated as MEDIUM severity.
