

# CVE-2022-30959

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-30959                                                                                                                                         |
| <b>State</b>           | PUBLIC                                                                                                                                                 |
| <b>Assigner</b>        | jenkinsci-cert@googlegroups.com                                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                           |
| <b>Published</b>       | 2022-05-17 15:15:00 UTC                                                                                                                                |
| <b>Updated</b>         | 2023-11-03 17:55:00 UTC                                                                                                                                |
| <b>Description</b>     | A missing permission check in Jenkins SSH Plugin 2.6.1 and earlier allows attackers with Overall/Read permission to connect to the Jenkins SSH Plugin. |

## Risk And Classification

### Problem Types: CWE-862

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product | Version | Update | Edition | Language |
|-------------|---------|---------|---------|--------|---------|----------|
| Application | Jenkins | Ssh     | All     | All    | All     | All      |
