# CVE-2022-3170

Print: PDF 

CVE-2022-3170 has been assigned by  [secalert@redhat.com](mailto:secalert@redhat.com) to track the vulnerability - currently rated as **HIGH** severity.

| Attack Vector | Attack Complexity      | Privileges Required | User Interaction    |
|---------------|------------------------|---------------------|---------------------|
| LOCAL         | LOW                    | LOW                 | NONE                |
| Scope         | Confidentiality Impact | Integrity Impact    | Availability Impact |
| UNCHANGED     | HIGH                   | HIGH                | HIGH                |

| Description                                                                                    | Tags                                                    | Link                                                                                                                                                                                                                                                                  |
