

# CVE-2022-32434

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                      |
|------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-32434                                                                                                       |
| <b>State</b>           | PUBLIC                                                                                                               |
| <b>Assigner</b>        | cve@mitre.org                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                         |
| <b>Published</b>       | 2022-07-15 21:15:00 UTC                                                                                              |
| <b>Updated</b>         | 2022-07-19 10:50:00 UTC                                                                                              |
| <b>Description</b>     | EIPStackGroup OpENER v2.3.0 was discovered to contain a stack overflow via /bin/posix/src/ports/POSIX/OpENER+0x5607: |

## Risk And Classification

### Problem Types: CWE-787

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                         | Product                | Version | Update | Edition | Language |
|-------------|--------------------------------|------------------------|---------|--------|---------|----------|
| Application | <a href="#">Opener Project</a> | <a href="#">Opener</a> | 2.3.0   | All    | All     | All      |
