

# CVE-2022-43029

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                   |
|------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-43029                                                                                                    |
| <b>State</b>           | PUBLIC                                                                                                            |
| <b>Assigner</b>        | cve@mitre.org                                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                      |
| <b>Published</b>       | 2022-10-19 19:15:00 UTC                                                                                           |
| <b>Updated</b>         | 2022-10-20 16:54:00 UTC                                                                                           |
| <b>Description</b>     | Tenda TX3 US_TX3V1.0br_V16.03.13.11_multi_TDE01 was discovered to contain a stack overflow via the time parameter |

## Risk And Classification

### Problem Types: CWE-787

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                | Product                      | Version     | Update | Edition | Language |
|------------------|-----------------------|------------------------------|-------------|--------|---------|----------|
| Hardware         | <a href="#">Tenda</a> | <a href="#">Tx3</a>          | -           | All    | All     | All      |
| Operating System | <a href="#">Tenda</a> | <a href="#">Tx3 Firmware</a> | 16.03.13.11 | All    | All     | All      |
