

# CVE-2022-46348

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-46348                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | productcert@siemens.com                                                                                                       |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2022-12-13 16:15:00 UTC                                                                                                       |
| <b>Updated</b>         | 2023-03-14 10:15:00 UTC                                                                                                       |
| <b>Description</b>     | A vulnerability has been identified in Parasolid V33.1 (All versions < V33.1.264), Parasolid V34.0 (All versions < V34.0.252) |

## Risk And Classification

### Problem Types: CWE-787

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product   | Version | Update | Edition | Language |
|-------------|---------|-----------|---------|--------|---------|----------|
| Application | Siemens | Parasolid | All     | All    | All     | All      |
