

# CVE-2022-46597

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                    |
|------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-46597                                                                                                     |
| <b>State</b>           | PUBLIC                                                                                                             |
| <b>Assigner</b>        | cve@mitre.org                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                       |
| <b>Published</b>       | 2022-12-30 21:15:00 UTC                                                                                            |
| <b>Updated</b>         | 2023-08-08 14:21:00 UTC                                                                                            |
| <b>Description</b>     | TRENDnet TEW755AP 1.13B01 was discovered to contain a command injection vulnerability via the sys_service paramete |

## Risk And Classification

### Problem Types: CWE-78

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                   | Product                            | Version | Update | Edition | Language |
|------------------|--------------------------|------------------------------------|---------|--------|---------|----------|
| Hardware         | <a href="#">Trendnet</a> | <a href="#">Tew-755ap</a>          | -       | All    | All     | All      |
| Operating System | <a href="#">Trendnet</a> | <a href="#">Tew-755ap Firmware</a> | 1.13b01 | All    | All     | All      |
