[Print: PDF](#)

Certain versions of [User Verification](#) from [Pickplugins](#) contain the following vulnerability:

The User Verification WordPress plugin before 1.0.94 was affected by an Auth Bypass security vulnerability. To bypass authentication, we only need to know the user's username. Depending on whose username we know, which can be easily queried because it is usually public data, we may even be given an administrative role on the

website.

CVE-2022-4693 has been assigned by contact@wpscan.com to track the vulnerability - currently rated as **CRITICAL** severity.

Affected Vendor/Software: [Unknown](#) - [User Verification](#) version = 0

CVSS3 Score: **9.8 - CRITICAL**

Attack Vector	Attack Complexity	Privileges Required	User Interaction
NETWORK	LOW	NONE	NONE
