

# CVE-2022-48217

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                    |
|------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2022-48217                                                                                                     |
| <b>State</b>           | PUBLIC                                                                                                             |
| <b>Assigner</b>        | cve@mitre.org                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                       |
| <b>Published</b>       | 2023-01-04 19:15:00 UTC                                                                                            |
| <b>Updated</b>         | 2023-11-07 03:56:00 UTC                                                                                            |
| <b>Description</b>     | ** DISPUTED ** The tf_remapper_node component 1.1.1 for Robot Operating System (ROS) allows attackers, who control |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor        | Product     | Version | Update | Edition | Language |
|-------------|---------------|-------------|---------|--------|---------|----------|
| Application | Tradr-project | Tf Remapper | 1.1.1   | All    | All     | All      |
