

CVE-2023-1035

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

Summary

CVE	CVE-2023-1035
State	PUBLIC
Assigner	cna@vuldb.com
Source Priority	CVE Program / NVD first with legacy fallback
Published	2023-02-25 08:15:00 UTC
Updated	2023-11-07 04:02:00 UTC
Description	A vulnerability was found in SourceCodester Clinics Patient Management System 1.0. It has been classified as critical. Affected versions are 1.0. The vulnerability is located in the login function. It is possible to bypass the login function and access the system without a valid username and password. The vulnerability is caused by a lack of input validation. The vulnerability is classified as critical because it allows an attacker to gain unauthorized access to the system. The vulnerability is located in the login function. It is possible to bypass the login function and access the system without a valid username and password. The vulnerability is caused by a lack of input validation. The vulnerability is classified as critical because it allows an attacker to gain unauthorized access to the system.

Risk And Classification

Problem Types: CWE-89

NVD Known Affected Configurations (CPE 2.3)

Type	Vendor	Product	Version	Update	Edition	Language
Application	Clinics Patient Management System Project	Clinics Patient Management System	1.0	All	All	All
