

# CVE-2023-1321

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-1321                                                                                                                     |
| <b>State</b>           | PUBLIC                                                                                                                            |
| <b>Assigner</b>        | cna@vuldb.com                                                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                      |
| <b>Published</b>       | 2023-03-10 16:15:00 UTC                                                                                                           |
| <b>Updated</b>         | 2023-11-07 04:03:00 UTC                                                                                                           |
| <b>Description</b>     | A vulnerability has been found in lmxcms 1.41 and classified as critical. Affected by this vulnerability is the function update c |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product | Version | Update | Edition | Language |
|-------------|--------|---------|---------|--------|---------|----------|
| Application | Lmxcms | Lmxcms  | 1.41    | All    | All     | All      |
